

ONE DAY MEMBER CONFERENCE

SHAPE WHERE THE IDM IS HEADING

Launching LGIDA's new strategy

FRIDAY
23 OCTOBER 2026

RACV Goldfields Resort
1500 Midland Hwy, Creswick

9:30am to 3:00pm

Since 2007 the IDM has been the standard regional councils rely on: one set of requirements across member councils, faster approvals, and decisions that stand up to scrutiny. In 2026, LGIDA set a three-year strategy to build on that foundation, and this conference is where it starts.

The new strategy commits LGIDA to three things: a **current, modular IDM** kept up to date on an ongoing basis; **technical meetings members look forward to**; and an **outward-facing association** that industry and government listen to. Every one of those starts with members in the room.

Come and hear the strategy first-hand, and **have your say**: bring your questions, your problem projects and your views on what Version 6 should fix. You will help shape the new program of technical meetings and set the priorities LGIDA takes forward on your behalf.

WHO SHOULD ATTEND

Engineers, development engineers and technical staff from member councils, and others interested in where LGIDA is heading.

PROGRAM

9:30am	Arrival and coffee
10:00am	Welcome and set-up for the day
10:30am	The strategy: where LGIDA is heading
11:15am	<i>Morning tea</i>
